VICTOR ANDRES BARILIN

SOFTWARE ENGINEERING \ FRONT-END DEVELOPER

+2 years of experience as a front-end development engineer working with a **U.S.** team. ● Outside of work, I enjoy working on personal projects; you can find some of them in my [portfolio](). ● I am attracted to the world of **IoT** and worked for 2 years at a company focused on it. ● In some of my projects, I handled the **backend** using **MongoDB** as the database and created the **REST API** in **Next.js** (based on **Express.js**).

WORK EXPERIENCE

Frontend Developer at Devias
2022 - Present [Argentina] [**ecommerce** B2C]

RESPONSIBILITIES

- Creating **responsive and accessible user interfaces** by following designs in **Figma** or improvising **designs** when needed.
- I am primarily focused on maintaining a **U.S. e-commerce** site called '[buckedup.com]()'. This site was migrated to React.js when I started working on it.
- I often have to **communicate** directly with **U.S.** staff to develop new **features** for the **e-commerce** site or to **fix bugs**.
- Good **tracking** of my **tasks** and the status of each one.
- Proficient in **Git** and **GitHub**.

KEY ACCOMPLISHMENTS

- Within **3 months**, I managed to take over the **technical front-end responsibilities** for the **"BuckedUp"** project, which was previously led by a senior developer with over 10 years of experience. This happened during my first year working at this company.
- **After 2 years** working for this company, I became a **key team member**. I decided to leave my country, Argentina, and the company was willing to raise my salary so that I could **continue working** with them **remotely**.
- I successfully optimized a critical application to improve our **relationship with the client** "BuckedUp," reducing the app's render time from 18 seconds to approximately 1 second.
- I had the opportunity to participate in the **development** of 2 mobile **applications**, where we managed to meet the **delivery deadlines** for these applications created with **React Native**.
- Over this time, I have become an important member for my **colleagues**. They often consult me for problems or **advice**, and I am always **willing to collaborate and learn** from others.

SKILLS

React.js	JavaScript	CSS	LESS	SASS
Tailwind	Next.js	Figma	Git	Github
HTML	Vercel	React Native	Adaptability	Fast Learner
Node.js	Team player			

EDUCATION

Web Developer at Platzi
2022 - Present

Software Developer at iTec Río Cuarto
2020 - 2022
